## Spiritual Diplomacy

### *“Spiritual Diplomacy and the New World Order”*

#### Introduction

Thursday, September 09, 2010

We have been asked if the New World Order will replace the old traditional world religions to create a new form of society and create the “Universal Church”.

We in Spiritual Diplomacy maintain that even during this revolutionary time of change in the 21<sup>st</sup> century the traditional religious organizations are not just superfluous to a historical context of the present day nation states; but in fact are critical to understand the development of modern society and nations.

We believe that without a “spiritual context” governments cannot understand world history or national historical significance.

The global cyclical movements of modern nation states are only a part of the larger progressive purposeful direction of God.

We and our supporters are faced with a complex world of global relationships interfacing with numerous religious movements. The failures and successes of nation states need to be judged spiritually as well as politically, economically and socially. The historical view of a universal history somehow enlightening the mind and illuminating the soul can’t be accurately interpreted without having a spiritual context.

Historically the Church does not exist to serve the State but the State was established to serve God.

It is only in recent times that the secular and atheistic argument against the separation of church and state has changed the perception of the role of government. The early founders of America did not want to eliminate religion from culture and society but to ensure that one religious sect or church (especially the Catholic Pope) would not determine who would be its president.

Spiritual Diplomacy is a movement which assists national leaders to find solutions to the religious riddles of modern civilizations and nation states.

It is a movement which allows leaders to see the church as transcending world history through the unity of God, a view that is rooted in a historical reality in the traditional religions of Judaism, Christianity and Mohammedanism.

We will explore the idea of tribalism and cultural evolution as spiritual developments in global development under a proposed one world government.

The globalist New World Order with its “Universal Church” and one world leader will be examined and explored in our subsequent parts of this report.

# Spiritual Diplomacy and the New World Order

## Part I

Friday, October 29, 2010

*“With a strong Spiritual Diplomacy movement you have a restraint against totalitarian ideology”*

### **Preface**

First I must clarify what I mean when I use the phrase “The New World Order”, and how we in the Spiritual Diplomacy movement use that term. We in Spiritual Diplomacy are particularly focused on the underlying and generally unseen spiritual elements in the establishment of a Global and One World Government.

Spiritual Diplomacy sees “The New World Order” as a proposed political and governmental structure motivated by unseen and conflicted spiritual forces.

Spiritual Diplomacy believes in a history that is progressing to a specific direction and conclusion as compared to those inside the New World Order who see history as moving to the destruction of the human race and extinction of the human species without the rescue of a Global Government.

Spiritual Diplomacy sees spiritual redemption within the human culture and political process. We do not necessarily see man alone as the determination of the world’s destiny. The New World Order however sees man as a material and collective body overcoming his primitive evolutionary status to establish a “New World Order”.

We have used the term in a modern sense taken from the humanist, socialist, collectivist science fiction and political writer, H. G. Wells’, book by the same title “The New World Order” and his friend Huxley and his book the “Brave New World”.

### **Modern proponent of the New World Order**

H.G. Wells had postulated and proposed a global society and culture emerging from a humanist collective controlled and directed by an elite New World Order. That “New World Order” would arise from the conflict between individual rights leading to a “world social democracy” where the masses interest will be represented through regulation. That regulation would “finally eliminate the oppression of the rich and their credit money institutions and banking agents”.

This whole issue of what is the nature of money and who will determine the social activity and value of what money represents will be left to the elite in “New World Order”. Wells and his friends had little respect for gold as money or a store of value. For them gold was useful for art and crafts!

In Spiritual Diplomacy we believe the silver and gold belongs to the Lord and that we as people are custodians.

Part of the “New World Order” was to redistribute not only the global wealth but also the global population. Even back then Wells saw the socialist model as a possible model to solve the “housing shortage in nearly every region of the world”. Wells and his friends wanted to have a global media and shame and blame propaganda program to improve housing conditions for the world’s poor.

The driving ideological thrust of the New World Order was to bring about the making and creating of “World Peace”. They needed to eliminate national states and private property contained within those Sovereign Nations and political systems to bring about what they say would be a global community without borders.

*"Armament should be an illegality everywhere, and some sort of international force should patrol a treaty-bound world. Partial armament is one of those absurdities dear to moderate-minded 'reasonable' men. Armament itself is making war. Making a gun, pointing a gun, and firing it are all acts of the same order. It should be illegal to construct anywhere upon earth any mechanism for the specific purpose of killing men. When you see a gun it is reasonable to ask: 'whom is that intended to kill?'" H.G. Wells the New World Order 1939*

They saw the fundamental problem of the world and civilization as “It is the system of nationalist individualism and un-coordinated enterprise that is the world’s disease and it is the whole system that has to go”.

We see the humanist scientific and technological development of nuclear weapons that are designed to destroy the very cultures they represent as the manifestation of the lack of spiritual and moral criteria in the policy of weapon deployment. The “New World Order” is conflicted over who will control these new weapons of mass destruction.

In Spiritual Diplomacy we see the world’s wealth in a custodial sense and that men and governments have responsibility for the spiritual development of mankind not for unjust personal enrichment.

**Super Cultures in Collision** Some historical observers have postulated that in order to save the planet from destroying its self, the establishment of the “New World Order” will emerge from a collision of the three major super cultures represented by ; *Western Civilization* (European/American) , *Asian Culture* and *Global Islam*.

The thinking is if a Super Culture is willing to physically and militarily destroy its cultural enemy it will use all resources it has, even nuclear and other weapons of mass destruction, to gain its own cultural superiority. It follows then that In order to prevent the destruction of the world the “New Global World Order” will somehow restore a balance of power between these warring cultural superpowers.

Even the Marxist, Capitalist and Socialist models of culture see what they understand as evolution of culture and society through class warfare; but because their materialistic and humanistic approach they lack the spiritual factors that we believe drive and motivate movements of mass culture change.

*"The New Deal is plainly an attempt to achieve a working socialism and avert a social collapse in America; it is extraordinarily parallel to the successive 'policies' and 'Plans' of the Russian experiment. Americans shirk the word 'socialism'; but what else can one call it?" H.G. Wells the New World Order 1939*

Super Cultures in conflict still have universal common economic and social elements that need to be addressed but they have local solutions to those problems.

*Directly we grasp this not very obscure truth that there can be, and are, different sorts of money dependent on the economic usages or system in operation, which are not really interchangeable, then it becomes plain that a collectivist world order, whose fundamental law is such a Declaration of Rights as we have sketched, will have to carry on its main, its primary operations at least with a new world money, a specially contrived money, differing in its nature from any sort of money conventions that have hitherto served human needs. It will be issued against the total purchasable output of the community in return for the workers' services to the community." H.G. Wells the New World Order 1939*

As we said before, after the First and Second World Wars the idea of some sort of world order arising from a multi-cultural community of equals was the creation of the liberal western intellectuals. This new order of institutional equality was manifest in the League of Nations and the establishment of the United Nations.

The tools of implementing the “New World Order” are the operation and control of the global regulators. Presently we see the United Nations and the OECD and IMF along with other international institutions; implementing specific economic orders and sanctions on groups and states that refuse to comply with the global agenda.

*"To keep global resource use within prudent limits while the poor raise their living standards, affluent societies need to consume less. Population, consumption, technology, development, and the environment are linked in complex relationships that bear closely on human welfare in the global neighborhood. Their effective and equitable management calls for a systemic, long-term, global approach guided by the principle of sustainable development, which has been the central lesson from the mounting ecological dangers of recent times. Its universal application is a priority among the tasks of global governance." United Nations Our Global Neighborhood 1995*

There has been a remarkable explosion of international and transnational regulatory civil servants and bureaucratic experts (paid by the taxpayers) to design and implement the global agenda.

We believe that these global institutions, which many are unseen and secret, are not acting under the authority of their own political governments but are actually guided by the unseen forces that many call the “New World Order”.

Because these super international and transnational groups are confidential, sometimes secret and work together through formal and informal alliances and treaties; they are perceived to be involved with a conspiracy against nation states and individuals within those states.

It was Huxley and H.G. Wells and their friends who were the intellectual group that promoted and formulated the ideological ideas for the “New World Order”

*"A really efficient totalitarian state would be one in which the all-powerful executive of political bosses and their army of managers control a population of slaves who do not have to be coerced, because they love their servitude. To make them love it is the task assigned, in present-day totalitarian states, to ministries of propaganda, newspaper editors and schoolteachers.... The greatest triumphs of propaganda have been accomplished, not by doing something, but by refraining from doing. Great is truth, but still greater, from a practical point of view, is silence about truth." Aldous Huxley Brave New World foreword to 1946 edition*

These unseen institutions with have real people, real buildings and real power originated from the European super culture that through its colonial past has internationalized its culture.

The fusion of culture if not marked by a dominant culture results in an incomprehensible culture.

When you look at modern European culture and see the Protestant failure of a continual European Reformation and revival you have left only the Catholic Church as the central continuity of culture.

A “New World Order” without an ideological atheistic communist system is now faced with a competitive Islamic world order that will emerge and wants to dominate over this “New World Order”

Unfortunately it has been observed that if you remove the spiritual ideals from modern liberalism you get a cruel totalitarian state.

We in Spiritual Diplomacy believe that with a strong Spiritual Diplomacy movement the world has a restraint against totalitarian ideology.

We are working through many of the issues that surround the political structures that govern nation states and the global economy but we disagree with the proposition and political and dictatorial structure that Orwell was proposing in his writings such as:

*The Party seeks power entirely for its own sake. We are not interested in the good of others; we are interested solely in power. Not wealth or luxury or long life or happiness; only power, pure power....Power is not a means; it is an end. One does not establish a dictatorship in order to safeguard a revolution; one makes the revolution in order to establish the dictatorship.... If you want a picture of the future, imagine a boot stamping on a human face - forever."*

*O'Brien to Winston George Orwell 1984 1949*

But the vanguard "New World Order" group that Wells, Huxley and Orwell were promoting has even extended to US Presidents as recent as George Bush and President Obama as well as other world leaders.

*"Ultimately, our objective is to welcome the Soviet Union back into the world order. Perhaps the world order of the future will truly be a family of nations." President George Bush Texas A&M University 1989*

*"We are moving toward a new world order, the world of communism. We shall never turn off that road." Mikhail Gorbachev 1987*

*"We must establish a new world order based on justice, on equity, and on peace." Fidel Castro United Nations 1979*

So as we can see the global policy makers across the world are looking for an international body to secure the future of mankind.

Where is this relinquishment of national Sovereign states taking us? How willing will the large cultural groups within and outside the traditional Nations respond to their threatened loss of cultural and religious identity.

That's what we will address in Part II when we will explore the rise of a "Universal Church" to give the moral and spiritual credibility to a "New World Order" which has only a failed humanism for a moral imperative. It is part two we will also see the emerging roll of a spiritual One World Leader who will ride into the 21<sup>st</sup> Century on the back of a "Universal Church"

End of Part I

## *“Spiritual Diplomacy and the New World Order”*

### Part II “Universal Church”

*“Great stages of world culture are linked with changes in man’s vision of reality” (Christopher Dawson)*

010/29/2010 7:05:34 AM Sunday

In our previous introduction we were asked if the New World Order will replace the old traditional world religions to create a new form of society creating a “Universal Church”.

In order to answer this question we must first deal with the cultural developments of nation states and how that relates to the New World Order.

The fundamental underpinning of any important long term civilization is its collective and spiritual life being passed on educating the next generation to its fundamental cultural values. The primary social unit will respond to local changes by altering their view of life, the tribal groups and classes within the larger society. This is how cultural groups evolve into national governments.

A new emerging Global Government will need a spiritual ideology base and new vision of reality to support a New World Order. The new global culture will need a new inter faith religion which is generally referred to as the “Universal Church” in the New Age.

#### **Culture & Government**

The church in the west and religious tribal village groups with their priesthood has provided leadership and the ruling class with a perceived mandate of authority.

The tribe, the village, the kinship groups, the family were and are fundamental to the political and governing relationships of a society.

Historically the ancient trails, roads and commercial highways brought social and economic change to the peoples living near those roads. It’s the same in the new “information highway” which is also bringing social, cultural and economic change today.

**In Spiritual Diplomacy we act as a bridge between cultures and governments.**

Where there are vast areas of social separation, it reminds us that local roots and community are the pillars of society. Where a foreign culture or power occupies a local culture it must be aware that if it doesn’t have a local organic relation to daily life with the people in its control, it will become dependent on the military and police rather than on a village or tribal consensus to govern.

The Americans have realize this by their occupation military and political policy of “winning the hearts and minds” of the local population.

The occupation of tribal and cultural groups by foreign governments is one of the primary areas that Spiritual Diplomacy is addressing. We use spiritual and physical programs (such as tree planting) in co-operation of governments and wealthy individuals to meet the tribal people's needs.

The spiritual needs of the tribe, the village and culture manifests as religious and church groups. In the "New World Order" a Global Government needs to control the church and religious organizations, thus the reason they will support and participate in a "Universal Church".

In order to achieve their global vision of world peace without the appearance of naked force they must have a religious inter faith organization which expresses order in the world adhering to the new world church.

In Western history and in particular modern western colonial history, we see a cultural legacy of imperialism. The Atlantic slave trade has left tens of millions of the black race stranded in cultural isolation from their African roots. We see the black African Diaspora as a major unresolved global issue. The return of the kidnapped racial groups to their origins will require a leader. Slavery within the social order has always been a major issue in the establishment of "world peace" and the "Universal Church". A solution to end the slave legacy will be a major element for the New World Order to facilitate world peace. Will a black diaspora leader emerge as a priest representative?

The New World Order needs to occupy the spiritual and religious mind of the culture to exert control. Within that framework they and their leader must be able to exhibit and demonstrate their connection with supernatural power, validating the call to order and obedience. For this they will need priesthood.

### **Prophecy verses Priesthood**

The classical struggle among cultures is the conflicts between the religious movements such as Jews vs. Christians, Sunni verses Shia, Catholic verses Protestant, and Hindu verses Buddhist. The conflict stems from who is in control; the traditional organization of the priests, or the unconventional voices of the prophets.

All cultures and governments (even secular) must address the issue of God and how God interacts with the people he has created. From the foundation of Egyptian civilization in Africa over 6.000 years ago to the Chinese pre dynastic era in Asia; kings, princes, chiefs, elder's prophecy all faced the issue of a supernatural or natural God. A God who represented past, present or future exercise of physical and spiritual authority over the society.

In Spiritual Diplomacy we understand the unspoken and unseen questions governments have about the nature of God and how they as government carry out justice, equity within their own societies.

We know of many politicians trying to reflect their culture, defining new movements, reflecting style, leading by example but trapped in the institutional bureaucracy of the past.

History and future history can be viewed as a result of moral decisions not just natural evolution; design verses process, interpretation rather than explanation, prophecy rather than theology, the supremacy and rule of the people and not of the law. (Law was made for the man not man for the law) The Priest administers the law which is designed and conservative. The Prophet calls for a change in the system that's revolutionary.

Is man governed by his spiritual, moral and religious belief or is he guided by blind adherence to the rule of law he still needs to examine the spiritual basis for his decisions.

Spiritual Diplomacy has answers to these questions of government.

## **Modification of Culture**

The New World Order seeks to modify human and social behavior into an infrastructure of the New World Order under a Universal Church.

In order to modify and change the culture and society they need to modify global DNA (Genetics), the environment, (Global Warming) the economy (International Banking) and the human mind (Mass Psychology)

We all know that language is the purveyor of culture and in some instances the protector of culture. Language grouping in culture is paramount in controlling governments; English, Latin, Greek, French and Russian were ruling languages.

The governing elite mandate a specific ruling class which uses unique language and terminology to consolidate their control on the operational reins of government.

The global elite supporters have even invented their own language, Esperanto. It was designed to distinguish and centralize communications among the new global order. The new language allows consolidation of governance with distance from the decentralization of multi-cultural and multi tribal languages. But a new language is emerging more powerful even than Esperanto which has failed to meet its expectations. The new language is the language of the machine.

English is associated with Western Culture, Chinese with Asia, and Arabic with the Middle East. The New World Order is faced with the tribalism language being managed into a new global language of technology; the machine, binary code and a merger where the dominate communication is in code not spoken language. Google instantly translates written languages on the internet into universal computer code shown in your own local language! But it is the code behind the written letters that is revolutionary.

A new important area for Spiritual Diplomacy is studying this new language in the spiritual realm. Areas such as "bible code" and Old Testament concepts of numbers having value and letter attachments. We are not speaking here about the magic of numbers but the spiritual implications of the numbers and letters.

Spiritual Diplomacy overcomes these language barriers with the language of love. For us the spirit of the language of love is the most driving force all. Acts of love are a demonstration of love not just in words but in action.

## **Spiritual elements in a global government**

The ancient Egyptians and their government believed that their god Khoum breathed life into the clay that made man. The clay was the physical the "ka" was the spirit. The issue for Government today is not so much of how they control the body but how they can control man's spirit and even god's spirit.

Governments are looking for ways to manipulate man's emotions and feelings. In order to control people's lives a repressive government must be able to manipulate and control the soul and spirit of the culture.

It is interesting to consider that black music in America was called "soul music" because of the music's emotional response and elicitation. The soul music of the black culture is an expression of a spiritual condition.

The culture of a community, tribe or nation manifests these spiritual and psychological connections to the spirit world; not just to a biological or environmental realm.

When we look at the Old Testament views on this spiritual element in government, we see that the law given to Moses was an example of obedience to the law as means of restraining emotional excess. Excessive emotions manifest an uncontrolled spirit or spirit which is in rebellion to the higher expectations of God. Expectations which include virtue, self-control, obedience to government and righteous behavior to our fellow man.

### **Will the real God stand up!**

Will the new god of the New World Order please stand up! Will there be a person who will take credit for creating new genetically modified life form? Will the new scientists be considered gods who create life? Will new cures for disease and healing practices be under the authority and control of the New World president so he can take credit for all this creation?

As we stated before, we believe the leader of the New World Order will do everything he can to genetically change the makeup of man. To change the original sinful nature of man requires a new biological and social organism. Alive but physically and psychologically constructed. Using genetics and Pharmacia drugs for behavior modification. We have in the past (a paper on Prophetic Speculation) referred to this as the "Psychogenetic Revolution".

**We in Spiritual Diplomacy see the ultimate goal of the new order under the agenda of "world Peace" the elimination of human sin by reconditioning and recreating the nature of man.**

What national government can stand up against such a powerful social and ideological agenda? Who can stand against a global policy against correcting personal imperfection and sin?

From the farmer to the nuclear scientist, all will be subject to the New World Order; there will be no allowance for rebellion. The choice will be either biological reengineering or physical elimination; that was the message of George Orwell in his books like Animal Farm and 1984.

Human rights will no longer be human, inalienable, but licensed and granted by government as it determines to be beneficial to its self-interests and society.

Under the new system what is considered human nature was flawed and in need of repair. It does not matter if it was personal, tribal or cultural. The old order is to be eliminated and replaced with the new order.

### **Redistribution**

In Part I we referred to the New World Order plan to redistribute the global population.

Population and wealth redistribution and its tribal cultures will allow for a new social order to be created replacing the old culture. Removing the poor from their substandard housing and relocating them into a new government built and planned community is what will rescue them from unhealthy urbanization. Wholesale removal and relocation of religious groups (Islam) away from the urban centers into more manageable and controlled community will be a necessary policy.

The new Global government will be faced with how to control the large urban population areas which are developing into their own autonomous economic units of the new super city states. The wealth redistribution will remove what's left of independent economic power of those groups to oppose the New World Order.

The whole issue of the dramatic rise of the super city state is an area that Spiritual Diplomacy wishes to address; especially in regards to diplomatic relations between Mayors of those city states.

We see the widening gap between the rich concentrated populations of the city dwellers as opposed to the poor people in the countryside. It will be critical for the future to bridge these social dynamics.

Country populations cling to the traditional ways of doing things like their fathers and ancestors while the city populations are parasitic off the economic vitality of the city.

The modern global issue is if a modern super city state can be self-sustaining in isolation of its original culture and government. Just look at China and Korea

Malcolm Muggeridge in the 1960's believed Western Europe was losing its vitality and the riches of its culture were in a decline into a "new dark ages". He was looking forward to contemplating the "New Jerusalem "" and the "City of God" to keep his last years focused on a positive future.

We recognize the precedents of the death of nations and cultures such as Egypt, Greece, and Rome. As Western European culture decays we look to who and what culture and nations will emerge to form this new world order . Which groups of tribes and communities, religious or secular, will manifest the creative spiritual energy and vitality to sustain a new civilization?

We look for new cultures to emerge from these cultural wars of the 21<sup>st</sup> century.

We see the results from past cultural conflicts between the European and American Indian Nations.

We see the Barbarian and Mongol resurgence and the destruction of historically important and significant societies as the battle for control of the "New World Order" and its Universal Church is played out in human history.

### **The dynamics of Spiritual Diplomacy, the New World Order and the "Universal Church"**

The change agenda of the New World Order and its Universal Church" and the Global Government will necessarily include someone or group representing the new order.

This new elite will necessarily integrate themselves into the present international governmental and religious organizations. These people will function to direct, redirect and adapt the old and present institutions to the new global agenda.

To include a successful introduction of the new religion and Universal Church will require a leader who can change the perceived reality or religious belief of society.

How this emerging leader will do this integration is a matter of great debate among the major religious groups of Islam and Christianity. Islam is looking for the Mufti and fundamentalist Christians the anti-Christ. In Europe there are over 20 million Moslems causing great cultural tension and conflict.

The new reality is already upon Europe and Western Culture which is steadily losing its dominance and cultural will to fight or resist the cultural invasion of its territory. For Europe its cultural reality is changed but the inherited political systems are not prepared for the physical and violent confrontation to come between the 20 million Shia and Sunni communities in Europe.

For Europe the new “Universal Church” will look like an answer to their problem and will be a political priority to implement a multi-cultural and multi religious institution to counter the power and furor of fundamentalist Islam.

If the New World Order cannot mitigate radical Islam with its global goal of worldwide domination, Shira law and a world Islamic Government, then the New World Order will be co-opted by Islam its self.

The Universal Church ( without its acknowledgement of a traditional God) under the New World Order will provide a place for the secular and atheistic activists who could not function under Shira law and the Moslem agenda especially in the areas of what they see as human rights.

We foresee that the groups behind the global church will initiate a global registration requirement for all religious denominations to be listed with details of names, addresses, and leadership registration and sect information; such as Shia, Sunni, Catholic, Protestant, Hindu Buddhist and even Pagan.

### **Environmentalism and the Universal Church**

The new world church sees the environment challenges such as “Climate Change”, “Global Warming” as too great an issue to be left to local and national governments.

They do not believe the present political and social structures can fix the environment problem so they call for a centralized Global Environmental Regulatory body.

The traditional religious views about the creation of the earth and who is responsible for maintaining it will be redefined within the new global church. The traditional view that God gave dominion over the earth to the humans he created will be rejected or modified to interpret that to be collective rather than individual.

There is a conflict with the materialism of the global industrial revolution and the conservative social structures that following the same old path that is not solving the pollution problems. They see the need to push for new bio friendly non fossil fuels as a way to institute green energy for the progressive agenda of ultimate control.

The global environmentalist movement has seen the information technology industry as part of the solution because they see man’s attempt to implement technology will save himself from his own destruction as a solution.

**We in Spiritual Diplomacy recognize the significance of this new technological information revolution that the world is presently facing. We see an additional risk in the spiritual area of the underlying need for a personal and physical social connection between people across all racial and social groups.**

An avatar physically appearing black, brown, oriental or white is not a real racial person; its representative. In a virtual reality the avatar is the new person in a new reality that the players create like God.

It may be easier for the global technology to improve race relations in cyber space but it’s another matter in the real physical world.

The new religion will use technology to consolidate its influence over the global information technology sectors of entertainment and propaganda. They will integrate and use the generational changes of the new social dynamic to co-op the traditional nation state and political models.

They will use the new global media and environmental movements to systematically destroy the culture and social structures and values of Western cultural Influence including the political and governmental institutions.

## Elimination of the Nation State

We see the continued effort of peoples and groups to protect their culture and traditions from structural attacks internally and externally.

For example the internet, email, Facebook, twitter and other social networks are fundamentally changing national and global culture and is finding opposition from social regulators who are urgently trying to draft new legislation to control this new culture. There are spiritual values being propagated through this new technology that most governments cannot allow on the basis of its self-survival.

As the traditional national governments begin to recognize their social disintegration of their culture, they will ignite a counter reaction to the technology which is challenging their authority. However it will not be an easy task because the dynamics of the social and cultural changes are generational even in their development of a new popular technological language evolving hourly like "texting" with its own terms and symbols only the youth understand.

This new technology carries the seeds of the nation state destruction. It carries the complex sub culture and cross culture of the blended family and multi culture society, an antithesis to the older classical family models going back even 6000 years ago to ancient Egypt. The destruction is like a virus within the technological code.

We see increased calls for community participation and individual involvement at the various levels of the new technology as cries for help and desperation from people themselves who are no longer active in their present and physical culture, but caught in a new cyber culture without borders.

We believe the culture changing spirit works on the culture changing groups and the leadership who are responsible for preserving the culture or introducing the change.

The educational establishment failures and the purposeful institutional self-interest of present school systems will be completely subdued to a new global government who will insist on direct control of all education.

The 1960's the "Age of Aquarius" with its drugs sex and "rock and roll" was a physical manifestation discarding the traditional cultural restraints. Free love, promiscuous sex, nudity, swearing all were challenge authority.

The movies and theater with musicals like "Hair" were symptomatic of a spirit asserting it's self in western culture change. The leaders were possessed to politically change the law, allowing for immorality. That spirit continues today the remnant movement of the 1960's. Only Islam has stood against it and is now on the front line in Europe to confront the liberalism of the Age of Aquarius.

Some believe that the new cultural changes will be accompanied by the destruction of the minority groups that are now becoming the standard bearers of cultural tradition.

## The Universal Church

The old definition of the Universal Church was the original name of the Roman Church, in the second century. In fact before and after the Edict of Milan in 312 AD, the Roman or Roman Catholic Church called itself the Universal Church. But we are referring to a new "Universal Church"

Will the new "Universal Church" be a multi-cultural or multi-racial inter faith church? Will the church mandate a new social life, a new social and ideological evolution in global culture? Will the new church be seen as an organ of western cultural imperialism? Will the new church promote a different God from the traditional religions of Christianity and Islam? Will the old ancient religious idea of many separate Gods be reintroduced?

We believe there will be a movement with the new inters faith church to promote some sort of Christ like leader to endorse the new Global Government agenda. A merger of Church and State within the New World Order!

The new church will direct their view of advancement of world culture by integrating what we call Pop Culture popular culture, and entertainment. The movie industry has and will continue to be more than entertainment but an attempt to create a new world art form to explore the possible future culture of a social order of machines, computers and man. A struggle to define and redefine the nature of man and his soul; who created man and what does his creator want.

Now we do not see the American Universal Church as the present denomination sees its self *"We are one with the totality, the creative source. We are one with the all of the Universe. We do not exist outside of the Universe nor does the Universe exist outside of us"*

We see that present US based Universal Church as part of universalism where they believe that there is one universal truth and that this truth extends far beyond any theological, social, or geographical limits

But we see the New Universal Church as an intricate part of a New World Order of Global government. We see the new church as an organization which will be used to control man, not to free man, a church which will have a central authority and a central agenda to be implemented by its members.

We do not see the new "Universal Church" as a collection of individuals who meet to worship a traditional personal God.

We see the new church emerging from the same intellectual spirits that create and promote the New World Order

*"A religion old or new, that stressed the magnificence of the universe as revealed by modern science, might be able to draw forth reserves of reverence and awe hardly tapped by the conventional faiths.*

*Sooner or later, such a religion will emerge."* Carl Sagan

*"The religion of the future will be a cosmic religion. It should transcend personal God and avoid dogma and theology. Covering both the natural and the spiritual, it should be based on a religious sense arising from the experience of all things natural and spiritual as a meaningful unity."* Albert Einstein

We believe the new "Universal Church" and its leader will be the spiritual force behind the New World Order which will be the front organization for the new spiritual agenda to change the nature of humanity.

End
